

MKTS Regions 中國皇帝

To indicate the start of an MKTS-MD Region, place a triple at-sign @@@ at the start of a line, immediately followed by a command name such as `keep-lines` or `single-column`. The end of a region is indicated by a triple at-sign without a command name. Nested regions are possible; for example,

you can put a @@@keep-lines region inside a @@@single-column region as done here:¶

unhandled event: ['{', 'single-column', null, { within_text_literal: false, map: [14, 25] }] Here are some formulas: ¶

u-cjk/4e36 、 ●
u-cjk/4e37 ヽ 〇、ノ
u-cjk/4e38 丸 〇九、
u-cjk/4e39 丹 〇冂〇、一
u-cjk/4e3a 为 〇、●力、
u-cjk/4e3b 主 〇、王
u-cjk/4e3b 主 〇亠土
u-cjk/4e3c 井 〇井、

u-cjk-xb/250b7 𪛗 〇●告巨皿

u-cjk-xb/250b8 𪛘 〇楊皿

¶

At this point, a line consisting of a triple at-sign @@@ indicates the end of the keep-lines region; since the single-column region is still active, however, *this paragraph runs across the entire width* of the documents text area.¶

xxxx¶

unhandled event: ['}', 'single-column', null, { within_text_literal: false, map: [39, 40] }] ¶
