

MKTS Regions 中國皇帝

To indicate the start of an MKTS-MD Region, place a triple at-sign `@@@` at the start of a line, immediately followed by a command name such as `keep-lines` or `single-column`. The end of a region is indicated by a triple at-sign without a command name. Nested regions are possible; for example, you can put a `@@@keep-lines` region inside a `@@@single-column` region as done here.

Here are some formulas:

u-cjk/4e36 、 ●
 u-cjk/4e37 ヽ ○、ノ
 u-cjk/4e38 丸 ⊗九、
 u-cjk/4e39 丹 ⊗冂●、一
 u-cjk/4e3a 为 ⊗、●力、
 u-cjk/4e3b 主 ●、王
 u-cjk/4e3b 主 ●ㄣ土
 u-cjk/4e3c 井 ●井、

u-cjk-xb/250b7 𪛗 ●●告巨皿

u-cjk-xb/250b8 𪛘 ●楊皿

At this point, a line consisting of a triple at-sign `@@@` indicates the end of the `keep-lines` region; since the `single-column` region is still active, however, *this paragraph runs across the entire width* of the documents text area.

Now a `}single-column` MKTS/MD event has been encountered that was triggered by a triple-at command in the manuscript; accordingly, typesetting is reverted back to multi-column mode, which is why you can see this paragraph set in two columns.
