MKTS Regions 中國皇帝

To indicate the start of an MKTS-MD Region, place a triple at-sign `@@@` at the start of a line, immediately followed by a command name such as `keep-lines` or `single-column`. The end of a region is indicated by a triple at-sign without a command name. Nested regions are possible; for example,

you can put a @@@keep-lines region inside a @@@single-column region as done here:

Here are some formulas: `u-cjk/4e36` 、 ●

`u-cjk/4e37` ⼂ ◑、丿

`u-cjk/4e38` 丸 ⊘九、

`u-cjk/4e39` 丹 ⊘冂◖、一

`u-cjk/4e3a` 为 ⊘、◗力、

`u-cjk/4e3b` 主 ◔、王

`u-cjk/4e3b` 主 ◔亠土

`u-cjk/4e3c` 丼 ◯井、

`u-cjk-xb/250b7` 𥂷 ◔◑告巨皿

`u-cjk-xb/250b8` 𥂸 ◔楊皿

At this point, a line consisting of a triple at-sign @@@ indicates the end of the `keep-lines` region; since the `single-column` region is still active, however, this paragraph runs across the entire width of the documents text area.
