This is a Demonstration

Regions

To indicate the start of an MKTS-MD Region, place a triple at-sign @@@ at the start of a line, immediately followed by a command name such as keep-lines or single-column. The end of a region is indicated by a triple at-sign without a command name. Nested regions are possible; for example,

you can put a @@@keep-lines region inside a @@@single-column region as done here:

Here are some formulas: u-cjk/4e36 丶 ●

u-cjk/4e37 丷 ◖丶 丿

u-cjk/4e38 丸 ◶九丶

u-cjk/4e39 丹 ◶冂◗丶一

u-cjk/4e3a 为 ◶丶◑力丶

u-cjk/4e3b 主 ◍丶王

u-cjk/4e3b 主 ◍亠土

u-cjk/4e3c 丼 ◯井丶

u-cjk-xb/250b7 罶 ◍◖告巨皿

u-cjk-xb/250b8 㯊 ◍楊皿

At this point, a line consisting of a triple at-sign @@@ indicates the end of the keep-lines region; since the single-column region is still active, however, this paragraph runs across the entire width of the documents text area.
